Modulex - Infinity Blazon

We have expanded our popular Infinity Basic series, which combines a solid expression and high-quality materials at favourable prices. The innovation in Infinity Blazon lies in the shape itself. For this range, our designers have drawn inspiration from classic coats of arms with their gently curved sides.

The results speak for themselves. A family of signs that seamlessly matches both formal and more creative environments. And an expression that both blends in – and stands out.

Shapes

Infinity Blazon consists of a broad range of individual panels in various sizes. The panels are available for wall and projecting mounted, for suspension and as floor and table signs. In addition, many of the panels can be supplied as Paperflex models, making it possible to change the information displayed in the blink of an eye.

Materials

The Infinity Blazon panels are made of 3 mm thick aluminium of the highest quality. If signs are to feature Braille or raised lettering, the panels are supplied in 3 mm phenol.

Every wall mounted sign is accompanied by a 12 mm black foam plate in the same dimensions as the panel. This plate makes it simple to install the sign using the clips supplied, and, at the same time, it can be positioned between the wall and the panel to create an exciting visual effect. Alternatively, the foam plate can be omitted from the installation for a "floating" effect.

Colors

Panels are stove-enamelled to your colour specifications to create a superb lasting finish. There are 128 different standard colours and more than 3,000 special colours. For all Tactile signs, panel colors are gloss 15 matt, all paperflex glass are matt and all fittings are MX17 dark grey.

Text and graphics

Infinity Blazon gives designers the freedom to create any style of sign they want, from bold and innovative to simple and elegant. The flexibility means that Infinity Blazon signs can be used in any environment. The solutions available includes vinyl, digital print, print on panel and tactile. All text on the Tactile signs are raised, and if requested, braille may be applied.

Questions?

For further information concerning technical data, sizes, custom or your own specified and configured signs, do not hesitate to get in touch with us. You will find our contact information at the bottom of this page and on: www.lexsign.se

Warranty

We provide a 2-year production warranty on all parts.

Environment

With a very few exceptions, all parts are made at our factory in Denmark and are therefore subject to some of the most stringent environmental requirements in the world. Moreover, in recent years we have received recognition and numerous awards for our ongoing work to minimise environmental impact and create a green, climate-friendly company.

Quality

Modulex has been awarded the ISO 9001 standard.
