

Modulex - Infinity Ellipsis

Why try to fit a square peg in a round hole?

This range was inspired by our popular Infinity Basic series, which is famous for its ease of installation, high quality and competitive price. In the Infinity Ellipsis range, we have created a variety of elliptical models that on their own or in creative combinations open up a whole new world of opportunities to allow the signs in a building to step up and step into character. The elliptical shape makes it possible to use the signs in a variety of ways.

Shapes

Infinity Ellipsis consists of a broad range of standard individual panels in various sizes and elliptical shapes. The panels are available for wall and wing mounting, for suspension and as floor and table top signs. In addition, many of the panels can be supplied as Paperflex models, making it possible to change the information displayed in the blink of an eye. Over and above the individual panels, we have put together a range of exciting combinations where the various panels are paired together.

Materials

The Infinity Blazon panels are made of 3 mm thick aluminium of the highest quality. If signs are to feature Braille or raised lettering, the panels are supplied in 3 mm phenol.

Every wall mounted sign is accompanied by a 12 mm black foam plate in the same dimensions as the panel. This plate makes it simple to install the sign using the clips supplied, and, at the same time, it can be positioned between the wall and the panel to create an exciting visual effect. Alternatively, the foam plate can be omitted from the installation for a “floating” effect.

Colors

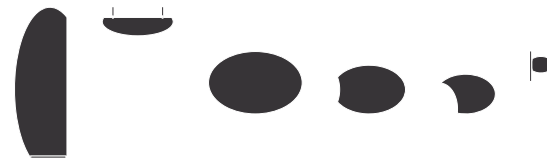

Panels are stove-enamelled to your colour specifications to create a superb lasting finish. There are 128 different standard colours and more than 3,000 special colours. For all Tactile signs, panel colors are gloss 15 matt, all paperflex glass are matt and all fittings are MX17 dark grey.

Text and graphics

The Infinity Blazon places no limits on creativity. The solutions available includes vinyl, digital print and print on panel.

The Combination of paired panels and the extensive graphical freedom, the range provides almost endless opportunities to build up creative interior design environments in offices, hotels, conference centres, hospitals and other public buildings.

All text on the Tactile signs are raised and, if requested, braille may be applied.

Questions?

For further information concerning technical data, sizes, custom or your own specified and configured signs, do not hesitate to get in touch with us. You will find our contact information at the bottom of this page and on: www.lexsign.se

Warranty

We provide a 2-year production warranty on all parts.

Environment

With a very few exceptions, all parts are made at our factory in Denmark and are therefore subject to some of the most stringent environmental requirements in the world. Moreover, in recent years we have received recognition and numerous awards for our ongoing work to minimise environmental impact and create a green, climate-friendly company.

Quality

Modulex has been awarded the ISO 9001 standard.
